3. Cessation of crude oil deliveries from Austria

Deliveries of crude oil from Dobermannsdorf, Zistersdorf, and Matzen to Luetskendorf are scheduled to cease during January 1955. It is believed that Russian crude oil will be imported to replace the Austrian product. This is causing some apprehension among technicians, since it will necessitate considerable readjustment with probably inferior results. Supplies of Austrian oil to VEB Mineraloelwerk Herrenleite have already ceased.

4. 1955 Plan

No production plan for 1955 has been announced at Luetskendorf.
